**ITELLIGENCE TO PROVIDE VALCO INSTRUMENTS, INC. CO.
WITH mySAP All-in-One SOLUTION**

*Leading Scientific Instrument Components and Systems Manufacturer Selects
it.manufacturing for Improved Organizational Efficiency and Communications*

Cincinnati, Ohio, August 29, 2005 – itelligence, 2004 mySAP All-in-One Business Partner of the Year for SAP America Inc., announced today that Valco Instruments Inc. Co. (VICI) has selected it.manufacturing, itelligence’s mySAP All-in-One solution for mid-market enterprises in the industrial machinery and components industry. Houston, Texas-based VICI has 250 employees and is a leading supplier of scientific instrument components and systems.

VICI selected it.manufacturing based on its ability to increase organizational efficiency through proven best business practices and improve organizational communications by providing clearer supply chain visibility with partners, vendors and customers. mySAP All-in-One solutions are available from SAP channel partners and provide industry-specific, cost effective, and quickly implemented solutions for specific micro-vertical markets.

“itelligence helped to deliver the benefits of SAP, and allowed us to realize that practices from other manufacturing companies could be applied to our own business,” said Stan Stearns, VICI’s President and CEO. “Furthermore, we valued that itelligence’s it.manufacturing could expand as our business needs evolved because it is backed by the stability and credibility of SAP.”

it.manufacturing is uniquely suited to integrate a mid-size manufacturing company’s disparate systems and can be implemented in as little as 16 weeks. With it.manufacturing, VICI plans to “bridge the communications gap” between the engineering, production and sales departments. In the integrated environment of it.manufacturing, a change made on the shop floor is made available throughout system, improving product traceability and visibility and customer service.

“it.manufacturing will enable VICI’s vendors to query our inventory and determine product delivery dates,” said Don Guillot, VICI’s CIO\IT director. “Not only will this decrease communication bottlenecks and speed up business, it will also allow our customer service representatives to focus on higher priority problems.”

“it.manufacturing will give us a great deal of flexibility in our daily reporting efforts,” said Mollie DeFrancesco, VICI’s general manager. “With the it.manufacturing suite, the majority of reports that we need will be prebuilt, based on best business practices for manufacturing and financials. The reporting tool will also give the user community the freedom to build more complex reports with very little additional technical knowledge.”

itelligence will begin implementing it.manufacturing at VICI's headquarters in mid-August, and then roll out implementations at VICI's other offices in Washington, Louisiana, Canada, and Switzerland. The first phase will involve it.manufacturing's core ERP modules, including financials, sales and distribution management, materials and management and production planning.

“We're proud to add Valco Instruments, Inc. Co. to our growing family of manufacturing companies in the mid-market enterprise space,” said Steve Niesman, itelligence U.S. president and CEO. “This further establishes itelligence's position as the leading choice for mid-market companies seeking mySAP All-in-One manufacturing solutions.”

In the future, VICI plans to incorporate other key SAP modules, including mySAP Customer Relationship Management (mySAP CRM). This additional solution will help VICI to fully maximize its overall SAP solutions investment and make better, more informed decisions about all aspects of the product lifestyle.

mySAP All-in-One solutions are designed to meet the needs of small and midsize enterprises with industry specific requirements. Based on mySAP Business Suite, mySAP All-in-One solutions are pre-packaged, affordable and quick to implement, helping companies streamline business processes, increase efficiency and achieve a rapid return on investment. More than 4,600 customers worldwide underline the solution's solid SME market presence. Leveraging SAP's business and industry expertise of more than 03 years, mySAP All-in-One solutions enable SMEs to drive new business value, increase revenues, support higher levels of innovation and improve the effectiveness of sales and marketing campaigns.
