

And the second prize goes to: itelligence

itelligence's team of developers among top two of the SAP Train Race

2 countries, 72 hours, 50 developers and 1 fast train – itelligence team second at SAP Train Race

Madrid/Bielefeld – November 8, 2011 – This year, SAP AG invited 50 developers to a remarkable SAP Train Race: A three-day training event and contest designed to develop an enterprise application based on the SAP NetWeaver Gateway technology. SAP NetWeaver® Gateway is a standards-based framework for enabling developers, with or without SAP programming knowledge, to create innovative, people-centric applications that link business users to SAP software over social or collaboration platforms, mobile devices, and Web applications.

And the itelligence team came in second with their Online Grading project. This solution was created for educational purposes within the public sector, allowing universities, high schools and private schools as well as companies to store HCM data. A teacher logs in and can select the course to be graded. They see the students who are enrolled on the course depending on the grade structure and can fill in the grades themselves.

Mark Albrecht, Vice President of Global Business Solutions, itelligence AG: “This train race shows how fast and easy adoptions and developments within the mobile environment can be executed and adapt to new business requirements within less than 72h”

The journey started in Paris with a one-day, immersive training event. Then teams had the opportunity to get hands-on with the technology before taking a trip on the Elipsos Train Hotel to the SAP TechEd 2011 event in Madrid, Spain.

The best enterprise applications based on the SAP NetWeaver Gateway technology were chosen by a panel of judges and the runner-up, itelligence, will receive great prizes and worldwide recognition at various SAP events throughout the year.
