

itelligence: Highest Level in SAP Partner Program for SAP Business ByDesign in Three Countries

itelligence achieves SAP Gold Partner status in Germany, Austria and Switzerland

Bielefeld, September 29, 2011 – itelligence AG, one of the most successful SAP Business ByDesign partners in Europe, is a gold-level channel partner for SAP Business ByDesign in Germany, Austria and Switzerland as part of the SAP PartnerEdge program. This makes itelligence AG the first Solution Reseller for SAP Business ByDesign to be in the highest level of the SAP partner program in three European countries.

itelligence thereby reinforces its achievements and expertise within the SAP ecosystem in marketing and sales of the latest SAP technologies, such as the on-demand solution SAP Business ByDesign at the international level.

Dr. Birgit Wittenbreder, head of itelligence AG's DACH business unit, says, "I am of course filled with pride that we have achieved Gold Partner status in these particular countries. Our very close cooperation with SAP, particularly in the market launch of innovative solutions in conjunction with the long-standing experience as an IT full-service provider in the midmarket, are important success factors for us, and we thereby offer the highest possible security for our customers."

Wolfgang Kröner, responsible for SAP Business ByDesign in the DACH region: "This recognition, and thereby this exceptional success, is based on our many customers in these three countries and, linked to this, the extremely high quality project work. The SAP Gold Partner quality seal for SAP Business ByDesign will motivate us constantly to continue to always do our best for our customers."

Classification as part of the SAP PartnerEdge partner program is based on various criteria, such as sales performance and development of new solutions. SAP also rewards participation in training and qualification measures. As an SAP gold-level channel partner for SAP Business ByDesign, itelligence will be included at an early stage in SAP's worldwide latest developments of product strategies, release updates and new technology. This fast communication leads to short project durations, even for demanding SAP Business ByDesign projects.
