

### Special Expertise Partnership Enterprise SOA for itelligence

## SAP consultant itelligence is Special Expertise Partner to SAP Germany

Bielefeld, January 8, 2008 – itelligence, one of the leading international full-service IT providers for SAP, ranked amongst the most awarded SAP consultants in 2007. By way of their systematic market orientation through solutions and service offerings for larger customer and SMEs, the SAP consultants in Bielefeld have year after year managed to achieve many of the coveted nominations for Special Expertise Partner of SAP Germany – 16 of these this year alone. This all confirms that itelligence is one of the leading qualified SAP consultants.

Herbert Vogel, CEO of itelligence AG, says: “This high number of Special Expertise partnerships is particularly special and shows the high quality with which itelligence is operating in the market. Each and every nomination represents a successfully completed project and a complex application and strict selection process at SAP Germany.”

The latest qualification, and definitely one of the most important ones, is itelligence being appointed Special Expertise Partner Enterprise Service Oriented Architecture (Enterprise SOA). By awarding this, SAP Germany AG & Co. KG is confirming itelligence’s expertise in the implementation of SAP Technologies in customer projects.

One of the best advantages for itelligence customers is the early integration of Special Expertise Partners in the development and marketing of the SAP solutions. These repeated itelligence nominations also become interesting in this context where, for example, the IT-full-service provider for SAP has been named Special Expertise Partner SAP ERP Human Capital Management for the fourth time in a row. Henrik Brauns, Director of HCM itelligence, points out: “Although SAP has greatly reduced the amount of nominated partners in the HR environment, we have managed to obtain this very important status yet again. Along with our customers, our most important partner SAP has through this confirmed our increased focus on new topics and process consultation, which we will systematically continue to pursue.”
