

itelligence at ACHEMA, the international congress for chemical equipment, environmental protection and biotechnology, Frankfurt, May 19 to 24, 2003

itelligence AG: it.chemicals - the SME solution for the core processes of the chemical industry

Frankfurt, May 08, 2003 – At ACHEMA in Frankfurt (May 19 to 24, 2003), itelligence AG will present it.chemicals, an SAP All-in-One solution developed specifically for the core processes of small and mid-sized chemical companies. At the SAP partner booth in hall 10.2 (K46 to K48), the full-service provider for SAP will show state-of-the-art solutions for integrated environmental management, special quality management solutions for the chemical and pharmaceutical industry as well as lot handling solutions for compliance with regulatory and customer-specific requirements. itelligence will also demonstrate the management of product variants with it.chemicals.

Background information about the it.chemicals industry solution

The it.chemicals industry solution is based on a proven master data model developed specifically for the chemicals industry, which permits precise consignment and stock management as well as simple sales and production planning. This master data model also supports exact calculation of bulk and container materials. Industry-specific extensions include container administration, container-specific production planning, bundling of bulk and fill orders, certificate generation as well as the integration of process conveyance and weighing systems.

it.chemicals leverages supply chain management through the networking of customers and suppliers as well as the modelling of inter-company processes and permits to integrate all relevant product and process data including from quality management and hazardous material management. Based on the SAP standard functionalities as well as an intelligent master data concept, the industry solution moreover ensures cost and planning transparency.
