

itelligence AG presents new industry solution based on mySAP All-in-One it.hightronics for the high-tech and electronics industry

Frankfurt, September 2, 2003 – In mid-September 2003, itelligence, a full-service provider for SAP, will unveil its new it.hightronics industry solution on the occasion of the “SKS Hightech Elektro” action forum of SAP, HP and itelligence. it.hightronics is based on SAP’s mySAP All-in-One solution and targets companies active in areas of medical technology, measurement and automation technology, electrical engineering, precision engineering, drive engineering and electronics. The launch of this new industry solution positions itelligence in the fast growing high-tech and electronics market.

Urban Hopen, Manager of itelligence AG’s Manufacturing Industry Line of Business: “it.hightronics rounds off our portfolio of industry solutions and allows mid-sized high-tech and electronics companies to benefit from the experience gained through numerous successful SAP implementations. it.hightronics is a comprehensive solution which combines all functions essential for modern management in a future-oriented ERP system (Enterprise Resource Planning) for the high-tech industry.”

As a mySAP All-in-One solution, it.hightronics offers functions of the Product Lifecycle Management, Customer Relationship Management and Supply Chain Management modules. it.hightronics can furthermore be connected to CAD and PDA (Production Data Acquisition) systems.

The industry solution for the high-tech and electronics industry is prepared for easy connection to the Internet, including mobile and e-business scenarios. External development partners can also be integrated electronically in the process chain. Preconfigured business processes such as form sets, role-based menus and a clearly structured user interface ensure ease of use. it.hightronics permits the complete management and design of product lifecycles from the planning stage to detailed engineering to the provision of spare parts for after-sales service. Development, design, logistics planning, controlling and project management thus form a dynamic, interactive enterprise network.

itelligence AG – Press Release

itelligence AG presents new industry solution based on mySAP All-in-One

it.hightronics for the high-tech and electronics industry

it.hightronics monitors and controls the entire logistics chain - from planning to distribution, procurement and production. it.hightronics opens up new possibilities for configuring variants and allows advance variant planning by determining the probability with which certain combinations of features will be used. As a result, subassemblies can be procured in advance which reduces the lead time from the entry of an order to the delivery of the product.

For the important area of after-sales services in the high-tech and electronics industry, it.hightronics offers functions for spare part, maintenance and repair services or contract, warranty and claims management.

it.hightronics - planned extensions

In a next step, it.hightronics will integrate quality management directly into the procurement and production processes. Quality planning, checks and control will largely be automated.

The high-tech and electronics industry has been operating on a global scale for many years. Consequently, the industry has to comply with international standards. it.hightronics takes this international orientation into account. For example, the currently applicable customs regulations of other countries are automatically considered, implemented and directly included in the materials management and distribution processes.

About itelligence AG:

itelligence AG is a leading international full-service provider for SAP employing some 1,300 highly qualified employees at 38 branches in 18 countries.
