

SAP, Microsoft, Oracle, etc. – Business goes mobile!

In their roadshow, itelligence, Cirquent and Integralis will present: Secure access for everyone

Bielefeld, January 25, 2011 – In a joint roadshow which will take place in ten cities in Germany, Austria and Switzerland, itelligence AG, Cirquent GmbH and Integralis GmbH will highlight the necessity of and options available for data security on mobile devices which run SAP, Microsoft, Oracle, etc. Under the motto, **Business goes mobile! Secure access for everyone**, the companies, along with selected specialists from their respective areas will jointly present a concise overview of the topic of data security with mobile devices.

The use of web-based mobile applications on devices such as iPads or smartphones represents enormous progress when it comes to a flexible working environment. The enabling of applications on the widest variety of end devices also means that confidential and thus security-relevant data is available at any time and at any location. A major risk is represented both by an undesired use of such applications as well as their nonavailability. The risk is significantly increased due to the variety and lack of controllability of the usage systems as well as the worldwide availability. Therefore, it is time to start thinking about supplementary measures in order to efficiently design worldwide access to applications such as SAP, Oracle and Microsoft, and to safeguard them behind firewalls. In this regard, itelligence, Cirquent and Integralis will provide:

- a complete overview, from business requirements and the associated challenges and risks to the solutions and their influence on the business processes.
- an overview of the realistic added value associated with the use of mobile devices
- detailed information regarding the design of efficient service and business processes in the case of mobile applications and
- a detailed presentation on the risks of using business applications

The roadshow will kick off on March 14 in Berlin. Participation is free. (additional dates can be found in the overview and more information can be found at: www.itelligence.de under the category: Events.)

About Integralis

As a leading international security solution provider, Integralis is characterized by its comprehensive expertise and extensive offerings with respect to IT security solutions. The Integralis portfolio is based on market-leading solutions and strategic partnerships which are oriented towards the planning, implementation and operation of global architectures for information security. The experienced consultancy team of Integralis supports the IT security projects of its customers through methodical and technical consultation with respect to planning and implementation of IT security processes.

Integralis has a network of 19 offices worldwide in Germany, Great Britain, France, Sweden, Switzerland, Austria, the USA as well as the UAE and Singapore. Their customers include governmental agencies and numerous well-known listed and internationally active companies. Integralis is a subsidiary of Integralis AG, which is listed on the Prime Standard segment of the German stock exchange, and has over 500 employees worldwide. In 2009, the Integralis Group had revenues of €173.7 million. Since the middle of October 2009, NTT Communications Corporation (NTT Com), a subsidiary of the Nippon Telegraph and Telephone Corporation (NTT), holds a stake of over 75% in Integralis. Additional information on Integralis can be found online at www.integralis.com.

itelligence press release

SAP, Microsoft, Oracle etc. – Business goes mobile!

In their roadshow, itelligence, Cirquent and Integralis will present: Secure access for everyone

About Cirquent

Cirquent is among top ten IT consultancy and system integration companies in Germany (source: Lünendonk list 2010). With over 40 years of experience, Cirquent Consulting offers its services along the entire value-added chain for banks, insurance companies as well as manufacturing, automotive and telecommunication companies.

In addition to industry-oriented strategy and process consultancy, the design, integration and implementation of technologies that support business processes as well as the operation and maintenance of IT systems are also part of their portfolio. Extensive industry-specific process, method and technological competence when it comes to customer management, finance transformation and application management are the core strengths of the company. Cirquent is a consultant to leading companies such as the BMW Group, Commerzbank, Munich Re and Deutsche Telekom.

Cirquent, with its headquarters in Munich, has four additional locations in Germany as well as offices in Austria, Switzerland and Great Britain. At the end of September 2008, the IT company NTT Data, which is listed on the Tokyo stock exchange and is a subsidiary of the Nippon Telegraph and Telephone Corporation (NTT), acquired a 72.9% share in Cirquent. The BMW Group also holds a 25.1% share in Cirquent.

Additional information on Cirquent can be found online at www.cirquent.de.

itelligence is one of the leading international full-service providers of solutions in support of SAP solutions, employing about 1,800 highly qualified employees in 19 countries and in five regions (America, Asia, Western Europe, Eastern Europe and Germany/Austria). As a frequently awarded SAP partner, among others global value-added reseller, itelligence realizes complex projects in the SAP solution-based environment for over 3,000 customers worldwide. In 2006, itelligence obtained gold-level status as an SAP channel partner as part of the SAP PartnerEdge™ program in Germany, and in the U.S. in 2007. The company's services in support of SAP solutions range from consulting and licensing to outsourcing and services to proprietary industry-specific SAP. In 2010, itelligence generated total sales of EUR 272.2 million (preliminary figures). In July 2010, itelligence was awarded the "TOP CONSULTANT" quality seal.
