FASTBOLT FASTENS TWO BUSINESS UNITS INTO ONE EFFICIENT SYSTEM

With 70 employees at companies in the UK and in Germany, Fastbolt Distributors is a leading European manufacturer and supplier of industrial fasteners. Until recently, the company ran two entirely discrete business systems across its two European sites, including its headquarters in Milton Keynes, England. With the implementation of mySAP All-in-One, Fastbolt wanted to combine the two separate business units into one.

Following implementation, the company reported multiple new efficiencies from its 40 users. These benefits included achieving full visibility across all areas, enabling enhanced and streamlined stock planning, improved responsiveness to customer demands, better forward planning, and a more effective response to new opportunities.
